

Claims

- [c1] 1. A system and method for accessorizing handbags comprising:
a handbag member attached to two handle ring members capable of receiving hooks;
a decorative handle having two ends said ends each having a hooking member; and,
a handbag ring member attached to a generally centrally located portion of a front surface of said handbag member capable of receiving a decorative hooking member.
- [c2] 2. The system and method for accessorizing handbags of Claim 1,
wherein, there is a plurality of handbag ring members attached to the handbag member capable of releasably coupling to several jeweled accessories.
- [c3] 3. The system and method for accessorizing handbags of Claim 1,
wherein, the hooking member has a tension spring applying continuous pressure to a hooking lever maintaining the hooking lever in a closed position.
- [c4] 4. The system and method for accessorizing handbags of

Claim 1,
wherein, the handle ring member is attached to the handbag member by a piece of handbag material.

[c5] 5. The system and method for accessorizing handbags of Claim 1,
wherein, the handle ring member is disposed substantially within a side surface of the handbag member.

[c6] 6. The system and method for accessorizing handbags of Claim 1,
wherein, the handle ring member is disposed substantially within a handle flap of the handbag member.

[c7] 7. The system and method for accessorizing handbags of Claim 1,
wherein, the decorative hooking member is an ornamented substrate having a jewel.
